Relex Software signs Phaedrus Systems as an Authorised UK distributor

(Rugeley, Staffordshire, nn March 2009) Relex Software (Europe) Limited, a wholly-owned subsidiary of Relex Software Corporation and a leading provider of reliability and maintainability software analysis tools and expertise, has announced the appointment of Phaedrus Systems as an authorised distributor in the United Kingdom.

“Phaedrus Systems’ role is to help support the developers of safety-critical and high-reliability systems,” said Simon Brailsford, Chief Executive, of Relex Software (Europe) Limited. “These are the very people who have most to gain from deploying our tool suite.”

“The Relex product family is another step forward to our offering a complete tool flow for the development of high-integrity systems,” said Chris Hills, Technical Director of Phaedrus Systems.

“These systems require careful assessment and monitoring, and with the Relex Reliability Studio we can now provide the leading tools in reliability analysis.”

Information for editors

Relex Software Corporation is a world leader in reliability analysis software, committed to the advancement of Reliability Excellence. In 1986, Relex Software Corporation entered the reliability industry with ground-breaking prediction software. After more than two decades of growth and experience, Relex Software Corporation today has a full suite of 11 software tools in the global marketplace covering the full life cycle of user products. Relex Reliability Studio tools include Reliability Prediction, Reliability Block Diagram (RBD), Failure Mode and Effects Analysis (FMEA), Fault Tree, Weibull, Markov, Life Cycle Cost (LCC), Human Factors Risk Analysis, Maintainability Prediction, Optimization and Simulation (OpSim), and Failure Reporting, Analysis, and Corrective Action System (FRACAS). As a full solution provider, Relex Software also offers reliability engineering consulting services and training programs.

Relex Software (Europe) Limited, a wholly-owned subsidiary of Relex Software Corporation, was established in 1999. Relex Software (Europe) represents our strong commitment to the European community. This subsidiary is conveniently located in the United Kingdom to provide full, top-quality customer service to our European customers. Relex Software (Europe) represents the European RAMS community in continuing to develop and improve the suite of Relex reliability analysis software tools.

Located in the Midlands, Relex Software (Europe) offers sales and marketing as well as technical support through the European Customer Support Helpdesk. Additionally, a training facility provides an ideal environment for seminars and training sessions.

Phaedrus Systems Limited is the UK's leading specialist in the support of engineers at all stages of embedded safety-critical and high-integrity projects. Tools available include requirements capture for IEC 61508, EN 50128 and nuclear applications, product variant management software, a SIL3 RTOS and compiler validation reports. Consultants have experience working on automotive, rail and aerospace applications, meeting standards such as IEC 61508 SIL4, and D0178B. Backing these is a wide range of other relevant embedded tools. Independent advice is strengthened by the company's founder being an active participant in several standards bodies, including ISO C, C++ and IEC 61508-3, and a principal author of MISRA-C:2004. Phaedrus Systems is based in Tamworth, Staffordshire. More information is available on the website www.phaedsys.com
